

SPD180

Handheld metal detector

SPD180 Is a popular handheld metal detector, high cost performance, stable performance. It is mainly used in places that need to be detected, such as daily metal anti-theft inspection by security guards, examination rooms, schools to prevent inspection from carrying communication tools for cheating, and unlisted metal detection places. The use of this handheld metal detector for personal inspection can avoid human rights disputes caused by manual search.

product features

- Simple operation, equipped with a leather case, easy to carry
- According to the need to adjust the sensitivity of human nature design, beautiful and generous, super high sensitivity.
- Simple and convenient to use and need no adjustment.
- When the voltage is insufficient, the indicator light is not on or always alarm.
- Strong and durable, one meter height free fall without damage.
- Light weight, large detection probe area, and fast detection speed.
- Two alarm modes are optional: LED sound and optical alarm or vibration alarm.

- Lateral adjustment of sensitivity, easy to operate, to meet different detection requirements.
- Rechargeable function, after installing the rechargeable battery, you can directly charge the product completely.
- With voltage indicator / charging indicator.

technical parameter

product model	SPD180
Metal detection accuracy	0.08mm blade: 40mm
	6mm diameter screwdriver: 90mm
	Pin: 30- -60mm
	Type 6-4 pistol: 180-195mm
	Six-inch dagger: 160-180mm
	20mm diameter steel ball: 120mm
	One-dollar coin: 75-100 mm
working power supply	9 Volt battery
service frequency	22KHz
working current	Less than 50mA
working temperature	-15°C-55°C
Complete machine power consumption	270mW
net weight	450g (including battery)
size	Length 410mm * width 85mm * height 41mm
packing measurement	50cm*28cm*45cm

application area

Safety inspection of school examination rooms, airport stations, customs docks, sports venues, large-scale activities, public inspection and law department, public places, border security departments and other important places, and anti-theft inspection of precious metal enterprises such as gold and silver jewelry, rare metals and electronic components factories.
